

N60.530; W1.174. Incubated 23.8.05.

24.8-29.8 lunche Ascidium

flaire ple ellipsoid 11-13 x 6-7 noeavi ✓

5.9 "mouldy" Sordaria sp 19-20 x 12-12.5 good sel.

asci 19-20 wide x 150 fungicola ✓

Ascidium abidus ✓

Lasitotus setae Swollen at base to 20 wide

x 240 long Spores uniseriate, asci 16 wide

spores ellipsoid 16-19.5 x 9

paras fine, cradled, not inflated or capitate, 2-2.5 wide

(Sp. 1?)

C. abidus ✓

12.9 Sarcobolus vesicola

A. albidus ✓

Lasitotus asc cylindrical 260 x 25-27

sp uniseriate ellipsoid 22.5 x 11.2

horizontal exapical all alignment (Sp. 2?) Coniuri ✓

setae 260 x 10-15 at base

"mouldy"

19.9 Gymnosporium ✓ brown yellow, with some long setae
brown head wall 75-100-110 long.

not yet mature

26.9 Gymnosporium ✓ darker orange now, with reddish
brown ornamented hyphae spores globose ca 3 diam ?
resii

Sch. westrickii 8 sp. poor scales uniseriate 19.5-22.5 x 10

Chaetomium, with greenish crown of setae
- rough, not branched. Asci clavate, spherical

Spores linear-form 12.5-13 x 9.5, smoky grey

3.10

I. canari sp. 21-22.5 x 12.5-13

Gym. neesi ✓

Sun. vesicaria ✓
