

N60.709; W0.942. Incubated 23.8.05.

24.8 Lasodermis asci long dark, 210 x 35
sp baseate 23.5-22.5 x 13.5.
setae < 260 long walls < 3 thick. horizontal
excipulum all. ~~sterile~~ / amicro

29.8 Lasodermis ✓ setae < 260, as above,
spores 22.5 x 12.5-13 horizontal excipulum all.
21-

○ Telephus ~~poly spore~~ ✓ poly ascid
Sp 4 ER sp 58.5 - 54.5 x 10 intermedia ✓

49 Asc. strictoides ✓ Sp. 4 ER 52 x 10 intermedia ✓
Telephus ~~hans~~ ✓ Sarcobolus ~~residua~~ ✓ 45-58 in one period

Lasodermis ✓ sp 27.5 x 12.8 Asc. albidus ✓

○ Perithecia immature - dark neck, short simple setae

Telephus ~~macrospore~~ ✓ asci 70-75 x 9-10
sp 8, baseate, 8 x 4 Capitate parol.

12.9 Coprinus ~~verrucosus~~ ✓ Cop. usseri ✓
sp v. dark, elliptical 8-9 x 4.8 Podospora ~~deeper~~ ✓
8-sp 37-38 x 19-19.5

"Hypha" ~~synonym~~ like Pyxid-ophan (as on 66/01)

Sp. intermedia ✓ (Pyxidophans) ~~Carriers~~ sp 21 x 12.5-13

Sch. nestriana ✓ 8-sp baseate, poor seeds - small, but
distinct sp 19.5 x 11.5 not all making evenly

T. microsporus ✓ Sacc. versicolor ✓

19.9 Cop. vermiformis ✓ T. microsporus ✓ I. canescens ✓

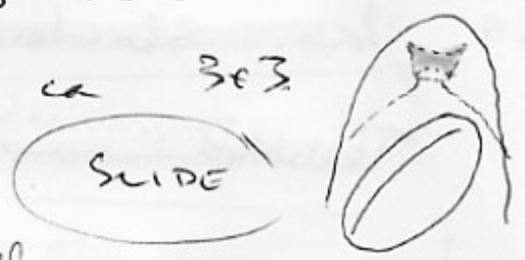

P. decipiens ✓ Sacc. versicolor ✓

Hypocrea ✓ ~~stroma~~ ± absent, ascium ca 650 μ m,
pale, translucent, apothecium red, which is darker, ca
150-200 high. NO spores. Plug bright blue in KI

Hypocrea ~~parula~~ ⁺ \ominus sp 10-10.5 x 6

ostiole toothed 16 μ m, overall
diam. of dark neck/ostiole 200-110 μ m
Asc: 100-110 x 11 ps 65-80

per clear brown KI ca 303

Sch. s.-sp., with crown of scales
sp bisenate 29 x 14.5-16.

Cantharellus

Sp UER 51.5-58 x 9.5-10

intermedia

26.9 Cop. vermiformis ✓ Helicoverpa ~~hirsutissima~~ ✓

Sacc. versicolor ✓ I. canescens ✓ T. microsporus ✓

Large Hypocrea, (a pellet!) black ostioles
shining on edge of white mycelial patch.

Sp. intermedia ✓ Cantharellus ~~sub~~ size over upper
half. immature

P. decipiens ✓ s.sp

2.10 Coprius miser ✓ l. carus ✓

Relter 1 Hypocopa still imma

Relter 2 Hypocopa imma. Conochaca imm.

Succ. vesicosa ✓ Thet. micropus ✓

Pod. decipies ✓ 8-sp Sp. intermedia ✓

10.10 Cop vesiculifer ✓ T. micropus ✓ l. carus ✓

P. decipies ✓ Hypocopa (1) imma.

Conochaca start seta all one

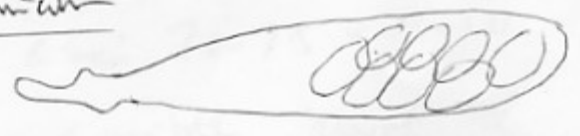

sp Oscad 11-13 x 8-9 x 6 Lymnaea ✓

kept for Hypocopa to make in Nov.

17.11 Cop. vesiculifer ✓ Cop. miser ✓ l. carus ✓

Sch. vesticola ✓ Sch. leucom ✓

Coprius serdecin spms x

White larvae 8-sp Coprius size 95-105 x 21-23

sp binate 12.5-13 x 8 para five,

circinate. Excimla Pflugard - panichyrot

cells ca 6-10

Hypocopa sp. with v. small, distinct basal cell

35-42 x 19-19.5 g. slit ca 25-29.30

1st bright blue

para 13 wide x 10 deep.
