

26.4 Sp. 4 ER 55 x 10 Druggal g. sh intermedia ✓

(mature Aschows spores 13-15 x 7-7.5
cracks in uncolored envelope just discernible
abidus (see 6.1) ✓

6.5 Schizotheca tetraspora ✓

Aschows white apothecia, up to 5-600 diam.
- 800
sp  25-29 x 12.5-13
albidus ✓

Sp. intermedia ✓

11.5 Asc. albidus ✓ Saccobolus 3+3+2 Sm 42 x 16
spores dark, minutely rough 16-17 x 8

versicolor ✓

Sch. tetraspora ✓ (mature 8-sp. Schizotheca ✓)

Pilobolus small-spored 5-6 x 3 umbonatus? ✓

15.5 V. fimbria ✓ Laschows left to name.

Sch. tetraspora ✓ A. albidus ✓ Sp. intermedia 57 x 9-10

Sp. antrax ✓ 4 ER 40 x 8

20.5 Laschows apothecium 760 diam. still not
fully mature. Size up to 450 um x 25⁻⁵⁸ at base
a separate, thick walled - 3 thick, apex pointed, shd

Asci 13-14 ✓ 225

Pores densely packed, cylindrical 2.5 wide

Spores obliquely uniseriate 22.5 x 9.5-11

Slender, but not fused

Ciliatus ✓

Sp. intermedia ✓

Sch. vestida ✓ 8-sp. par

Sch. vesicular ✓

Scales sp. 19.5-22.5 x 10

24.5 Polyspor

Setae perithecia. Ascii round headed ^{setae sparse.}

wider below.

NO apical ring. Ascus 180 x 58

immature spores

with appendages - not yet

clear whether

Aurum or Podospira

L. ciliatus ✓

27.5 Saccobolus vesicular - spore ante ray

Small < 400 white apothecia - Coprinus?

asci cylindrical, 1-2 seriate, 16-20 wide x 8.5 long

sp. ellipsoid 12.5-13 x 8, v thin gel.

Pores dense, 2 wide uniseriate.

A. albidus ✓

L. ciliatus ✓

Sch. tekampum ✓

(discarded 27.5 being eaten (by beetle?))
