

11.8 Podospira ~~appadrata~~ ^x abundant in field
 sp 25-26 x 13.5-14
 app 30 long. Setae < 50.

Comocharta 8-sp. 12-13 x 9.5-10 x 5 Setae < 40
 Ascii 110 x 13 lignaria ^x

~~Con. scutigera~~ ^x recorded from sample in work room

15.8 Con. lignaria - P. appadrata ✓

17.8 Psilomyces ceprophila ^x did material? Spores
 brownish 16 x 8-8.5  chytocystidia 
 1st as in 6/06

Comocharta lignaria ✓ P. appadrata ✓

26.8 P. appadrata ✓ Con. lignaria ^x sp heavily distorted
 12.5-13 x 8-9.5 x 5-6
 Ascii 110-130 x 11-13

31.8 P. appadrata ✓ Pod. decipiens ^x 8-sp 38.5-40 x
 20-21
Schizothecium 8-sp imbricate basiate Setae only
 1-3 celled Vestricaria [?] ^x

22.9 Cop. miser ^x

24.9 Cop. anser - Comocharta 2 sp + sp
 12-13 x 9.5-10 x 7-8 lignaria ✓

Amnium Pod appedulata ✓

2.10 Cap. miser ✓ P. appedulata ✓ Con lignosa ✓

~~Discarded 2.10~~

9.10 Cap. miser ✓ Cap. caespitosa x Cap. pulchra x ? imm
P. appedulata ✓ Sch. restricta ✓ no pleurocystidia, no pleurocystidia
PS. itype Stroph Small cream gelatinous urticated cap
5 mm diam

Stipe white silky shiny 2 mm x 7 cm

gill edge cystidia

Sp. 14.5-16 x 6.7-7

not orange

v. slight trace of ring zone or stain

19.11 Cap 15 mm diam, pale cream, gills still white (sterile?)
Stipe 20 cm long x 3 cm, white with ring zone

Large hairy perithecia - Pod. intricata x

Asci 310 x 74

Sp 46-48-51 x 22-24

pedicel 19-22

Con. scabigena ✓
P. appedulata ✓

Smaller than old Psilocybe?

gills 13-17 x 8.5-9 as 9.10 above. Gill edge
cystidia as above, + some rare filamentous

30.11

Psilonyx

cap 2 cm diam

34/06

sp ellipsoid, rot angular, apical g.p

(11.2) 13.5-16 x (6.5) 7-8

(H)

Coprophila ✓

Cen. lignaria ✓

abundant P. intestivaca (H)
