

13.3 - 17.3 Piloborus sp. hyaline ellipsoid
 7-9 x 5.5-6
crystallinos ✓

Pilaira sp. hyaline, pale yellowish 9-12 x
 6.5-7 ✓

23.3 Ascaris abstrus ✓ noceani ? ✓

T. steinhausi (p. 105 p. 106) ✓

Pilaira ✓ sp 10.5-13 x 7-8 hyaline - pale yellowish

28.3 A. abstrus ✓ Pilaira ✓ P. lobosus ✓

13.4 A. abstrus ✓ Delebobus microsperus ✓ apithec
 v. pale yellowish green < 250 diam. Ascii 60-65 x 11-12
 sp. ellipsoid biserial 8-9 x 4. Paras Capitate,
 yellowish green contab

Also a large apithecum Ascaris - spores
 disclosed, but many small spores 11.2-12.8 x 6.5
 Check later. - yes present in
 'empty' apithecum. Paras irregularly Capitate - smaller,
 with yellowish green contab. Immature asci ca 110 x 11
crematoris ✓

20.4

A. albus ✓

P. lobbii sp 9.5-11 x 6.5

yellowish on nose.

25.4

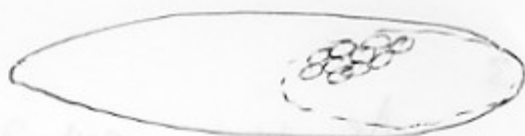

Coprinus per-ordinum

crystalline ✓

Telephorus microsporus ✓

Telephorus polygams ✓

Telephorus / Ascoczium ✓

Spores wall 42 x 16

Sp ellipsoid, 7 x 3.5

90 x 22

64? spores

not A. woodhousii fruit-shaped

P. crystallinus ✓

1.5 Schizothecium 8-sp h-sectate sp. 25-26 x 13-14.5

small distinct scales

conium ✓

Asci 250 x 32

Coprinus vent of glucose cells - linear?
for large fruit strucment?

12.5 Coprinus cross-spore

glucose cell.

8 x 8 x 8

Another Ad Coprinus head spore ellipsoid 9.5 x 6

22.5 he has Coprinus appeared
