

Sheep. north-east side of calf, Calf of Man, Isle of Man. SC167660. 29/07
2.7.07. N54.0533; W4.8038. 90m. Incubated 8.7.7

8.7 Lasobolus coniculi? sp 16 x 10
Setae < 225 x 11 at base - not markedly
ventricose. check later when more material

15.7 Saccobolus 3+3+2 sm 41-42 x 14
sp smooth 17-18 x 7 Ascii 95 x 29.
versicolor ✓

Pilobolus crystallinus ✓

Lasobolus ascii 30-32 wide. Setae < 13
wide at base 80-240 long. Sp biserial
24-20 (17) x 12.5-13
coniculi ✓

Thelobolus nanus ✓

19.7 Cephus leptoneus ✓ Sides + spheroid sp
sp. 12.5-13 x 4.5-5 

Sacc. versicolor ✓ L. coniculi ✓

Mixo brown stripe ^{<225 long} red lead with white
crystals * Spores mainly verrucate, brown, 9.5-10,
± globose. Drymium megalosporum
Calcium (negative)

28.7 Cephus stercorarius ✓ Cep leptoneus ✓

Saccobolus versicolor ✓

Coprinus v. dark ellipsoid spores 9 x 4.5-5
thin walled, narrow neck with pegs.
Some globose cells also present. vermiculifer?
check ID.

Sch. tetrasporium

Coprinus white asci 8-sp 110 x 24 biserial
12.5-13.5 x 8 ellipsoid discolor
paras arcuate

6.8 Ditymum neopolysporium Cop. vermiculifer

Cop. sterzneri Psilomyces mercurii

Podospora pleurospora 16-sp 35-43 x 19-21

Sacc. versicolor Coprinus - white. Asci

broad 80-100 x 22-23 sp biserial 12.5-13.5 x 8

Some others uniserial 80 x 12? discolor

Paras arcuate, net or lacy under strip

11.8 Coprinus Cop. vermiculifer Stropharia as others
discolor

Coprinus sexdecimsporus Sch. tetrasporium

Sp. UER minima halving, 29-32 x 5-5.5

19.8 Ditymum Ps. mercurii Cop. vermiculifer

Cop. sexdecimsporus Sch. versicolor 8-sp 1-2 serial

Sch. tetrasporium sp 21-22 x 11

27.8 hairy Podospira sp 32-35 x 16

no big scales, slight vertical ridges at neck

sp. uniseriate Ascii no

apical structure.

270 x 26-30

24 apperages

not readily in evidence - vague faint halo in II

Phanospira Copropile

cf. glutinans?

Podospira

biseriate

8-sp.

with globose

pale brown body 300 diam + darker setae

neck 90 x 90, Setae mostly < 50, a few

larger, p der towards base sp. 1 umche spore

clavate

28.8 Podospira same as above. Asc fixed 190 x 30

8 sp biseriate. imake spore clavate

42 x 12

Coprus sedecimsporus

Podospira

hairy - but only

below - empty lines of scales above -

Schizothecium at neck. small scales sp

32 x 16-19

? glutinans / curvulabes / ~~sinuata~~

no structure 24 apperages seen, in II

Dodymum

spore

9-10

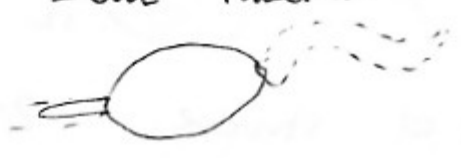

globose

minutely

verrucose.

1.9 Sch. subtrans ✓ sp. 30.5-32 x 16-17
uniseriate. Small vertical lines of Scales
red. Near 1m tall x 550
lightly hairy below. Semi immersed.

Phan copypite ✓

Doied 1.9
